ENHANCING THERAPY CREAM INSTRUCTIONS FOR NATURAL/VIRGIN HAIR

STEP 1

Shampoo hair with Nanokeratin Priming Shampoo, lathering for 1 – 2 minutes to remove any residue from the hair and roots and to open up the cuticle.

Do **NOT** use a conditioner

For Virgin Hair, shampoo thoroughly **three** times.

Rinse well, comb through the hair and rough dry completely.

STEP 2

Put on gloves

Shake the bottle of Enhancing Therapy Cream well and pour out 40ml-50ml into the Nanokeratin Bowl.

Section hair into four and **sparingly** spread the product with the Nanokeratin silicon brush, beginning at the nape of the neck.

Spread at a distance of 1.5cm from the scalp and then comb downward with the Nanokeratin fine toothed comb to remove any excess product.

Complete the back sections first and finish with the sides.

STEP 3

Leave on hair for **30-40** minutes, and then blow dry on a medium heat setting.

There is no need to concentrate on straightening the hair at this point, rather just make sure the hair is 100% dry.

STEP 4

Divide hair into 4 sections.

Begin at the nape of the neck and work with small sections of hair around 2.5cm each.

Iron each section 8 – 10 times with the Ceramic Irons at a temperature setting of **210-230** degrees.

Each section of hair can be gone over until the desired level of shine and smoothness is achieved. Complete this process over the whole head.

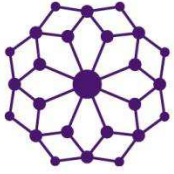

IMPORTANT AFTERCARE INSTRUCTIONS

Client cannot shampoo the hair for 72 hours

After 72 hours, shampoo the hair with Nanokeratin Invigorating Shampoo and conditioner the hair with Nanokeratin Hydrating Conditioner.

After 2 weeks, introduce Nanokeratin Re-Invent Leave-in-Conditioner
